

Registering in SAM

Get It Right From The Start

There are changes coming to SAM within the next year. They include a replacement for the DUNS number system and a revamp of the SAM website that will incorporate other government websites like Federal Business Opportunities (FBO). Stay on top of these changes by coming to this free workshop.

This workshop will include a video by **Steven Koprince**, Managing Partner of Koprince Law, that will cover the Representations and Certifications portion of the SAM registration to help you avoid making false claims to the government, which can carry stiff penalties.

Topics Include

- How to spot and avoid registration scams
- Things you must have prior to creating your vendor profile in SAM
- How to PROPERLY register your entity and common mistakes to avoid
- The contractual language in the Representations and Certifications section to help you avoid making false claims
- The new Unique Entity Identifier (UEI) that will take the place of the DUNS number
- Beta SAM and the SAM site upgrade.

**Thursday September 5th
1:00 pm to 3:00 pm**

**NorthWestern Energy
Conference Room
11 E Park St
Butte, MT 59701**

John Schneeberger, CPP
